

Satish Chauhan

Software Engineer | Full-Stack Engineer | Mumbai, India

+91 9011579946 | satishkc2000@gmail.com | github.com/satish-chauhan | linkedin.com/in/chauhan-satish

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience designing and shipping scalable web applications, REST APIs, GraphQL services, and microservices using Java Spring Boot, NestJS, Node.js, TypeScript, Angular, and React. Strong foundation in system design, microservices, OOP, and SOLID principles. Hands-on with Agile/Scrum, CI/CD, Git, Docker, Kubernetes, and cloud deployment on AWS and Azure. Known for pragmatic problem-solving, technical leadership, and end-to-end feature ownership from concept to production.

CORE COMPETENCIES

- Full-Stack & Backend Development
- Frontend Engineering & UI Optimization
- Enterprise Application Development
- Software Architecture & System Design
- Microservices & Distributed Systems
- Cloud-Native Development & DevOps
- API Development & Integration Engineering
- Scalable Application & Platform Engineering
- Performance Optimization & Reliability Engineering
- Agile Development & SDLC Management
- Product Engineering & Technical Leadership
- Secure Application Development & Authentication
- CI/CD Automation & Deployment Management
- Quality Engineering & Test Automation
- SaaS Platform & Enterprise Content Management

TECHNICAL SKILLS

Languages: Java 21+, TypeScript, JavaScript, SQL, XML/XSLT

Frontend: Angular, React, Next.js, Electron.js, RxJS, Angular Material, PrimeNG, Tailwind CSS, Progressive Web Apps (PWA), HTML5, CSS3/SCSS

Backend & APIs: Java Spring Boot, NestJS, Node.js, Supabase, GraphQL, REST APIs, API Design, AWS Lambda, Cloud Functions, Firebase, Microservices, Backend-for-Frontend (BFF)

Data & Messaging: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Azure Service Bus, Kafka

Cloud, DevOps & Observability: AWS, Azure, GCP, Azure Pipelines, Docker, Kubernetes, NGINX, Vercel, CI/CD, YAML Pipelines, Linux, Bash, Prometheus, ELK

Tools & Version Control: Git, GitHub, GitLab, Bitbucket, Maven, Yarn, Webpack, Jira, VS Code, IntelliJ IDEA, Postman

Testing & Quality: Jest, JUnit, Jasmine, Karma, JaCoCo, Mockito, Test-Driven Development (TDD), ESLint, Snyc

Auth & Integrations: OAuth2/JWT, CSRF, Token-Based Authentication, Role-Based Access Control (RBAC), API Security, OpenAPI/Swagger, Shopify OAuth, Razorpay, Webhooks, postMessage API

Methodologies: Agile/Scrum, SDLC, System Design, HLD, LLD, Software Architecture, Monorepo Architecture, Code Reviews, OOP, Performance Optimization, Scalability, Mentorship

EXPERIENCE

- Software Engineer

Quark Software Inc | Jul 2025 - Present | Mohali, India
- Drove system design and feature engineering on Quark Publishing Platform (QPP), owning platform-level delivery, cross-team coordination across 5+ repositories, and stewardship of core platform components.
- Owned end-to-end feature delivery on **QPP** across frontend and backend, creating intuitive UI, and ensuring seamless data flow between **Angular** applications and microservices-based backend using **Java Spring Boot** and **NestJS** from architecture through implementation, testing, and production rollout.
 - Supported **DevOps and production operations** by resolving deployment failures, supporting **CI/CD pipelines**, and implementing root cause fixes to improve stability and reliability.
 - Managed **Sev-1 customer tickets** end-to-end, collaborating with clients on live calls to troubleshoot issues and deliver resolutions within strict SLAs, with root cause analysis and preventive fixes.
 - Directed PR reviews across **5+ repositories** spanning frontend, backend, and platform teams, enforcing engineering standards and cross-team alignment.
 - Eliminated repetitive workflows via **agentic automation** by authoring independent **AI agents** and composable **skills/subagents**, covering **dev environment setup**, **code quality enforcement**, and **local deployment**.
 - Co-owning the **Content Modelling Service**, QPP's structured authoring core, managing **XML-based content schemas**, schema-validated section hierarchies with cardinality constraints, block styles, and **XSLT-driven XML-to-HTML rendering pipelines**.
 - Built **External WebApp Integration**, a **bidirectional postMessage communication framework** with **secure auth token exchange** for embedding custom web apps, achieving **zero security incidents** post-rollout.
 - Migrated **Azure Classic Pipelines to YAML CI/CD** across 3 repos, automated **Docker artifact publishing**, and reduced deployment time by **~45%** with improved rollback reliability.

Software Engineer I

Quark Software Inc | Jul 2023 - Jun 2025 | Mohali, India

Grew rapidly from entry-level to a trusted contributor on QPP's enterprise stack, taking on increasingly complex work spanning the full product lifecycle over a 2-year tenure.

- Improved UI responsiveness and application performance by optimizing **Angular components**, reducing load times, and enhancing rendering efficiency across key user workflows
- Delivered **50+ features** and bug fixes on **QPP**, in an **Agile/Scrum** environment, in collaboration with product, QA, and DevOps teams across sprint cycles.
- Engineered a production-grade **JaCoCo code coverage pipeline** with **Redis-based session management**, **S3 upload**, and instrumented builds across **microservices**, uncovering **20%+** untested edge cases.
- Led the migration of the Application Services backend from **Giuseppe to NestJS**, modernizing **38 controllers** and **100+ REST APIs** orchestrating **40+ downstream services**.
- Implemented **S3 and Azure Blob Storage** integration for workspace configuration import/export, backup, and restore, enabling **cross-environment portability** and cutting customer onboarding time by **~50%**.
- Mentored **2 interns** on **Angular** best practices, **unit testing**, and code review processes.

Campus Intern

Quark Software Inc | Jan 2023 - Jun 2023 | Mohali, India

Campus hire entry point at Quark, onboarded onto the QPP Angular codebase and independently prototyped an AI-powered data visualization product alongside core testing responsibilities.

- Integrated **unit testing frameworks** across **4+ Angular** applications and libraries, establishing a consistent **testing baseline**, and developed **1,000+ unit tests** within 3 months—identifying and resolving **120+ bugs** across multiple modules.
- Initiated the **POC** for **Infografix**, a web application converting textual data into **AI-generated graphics**, and collaborated to build it from the ground up.

Co-Founder & Tech Lead

Advanture Innovations | Apr 2021 - Dec 2022 | Mumbai, India

Co-founded a tech services startup managing client acquisition, project scoping, full-cycle delivery, operations, and a cross-functional team.

- Built **20+** client websites, mobile apps, and a **SaaS billing platform** with **secure payment integration**.
- Led a 3-member team with **90%** client retention.

PROJECTS

Rent Wheeler | Car Rental Platform | rentwheeler.com

A production-grade, full-stack Progressive Web App (PWA) car rental marketplace digitizing the largely offline self-drive rental industry. Delivers a mobile-first booking experience with real-time availability, multi-image carousels, transparent pricing, and Razorpay-backed token payments with webhook-driven booking state sync. Includes an operator dashboard with per-vehicle revenue analytics, custom reporting, fleet and station management, booking lifecycle controls, and review moderation, transforming manual operations into a data-driven system.

Next.js TypeScript PostgreSQL Supabase Docker Nginx Razorpay

Uniwik | Brand Discovery & Verification Platform | uniwik.com

A trust layer for the D2C (Direct-to-Consumer) ecommerce ecosystem that protects consumers from fraudulent stores while helping legitimate brands reduce RTO (Return to Origin) losses, fake orders, and credibility gaps. Features include multi-step KYC (Know Your Customer) onboarding, secure document handling with AWS S3, Shopify integration via OAuth 2.0, and a JWT-based authentication system, built with Next.js and Spring Boot.

Next.js TypeScript Java Spring Boot PostgreSQL AWS S3 AWS ECS Docker Nginx

SaaS Billing Platform

Built a scalable SaaS billing platform used by 100+ clients, featuring automated payment workflows, RESTful APIs, and secure payment gateway integration, reducing processing errors by 40% and improving transaction reliability.

React Electron.js Node.js Java Spring Boot SQL Payment Gateways

EDUCATION

B.E. in Electronics and Communication Engineering

CCET, Panjab University | 2019 - 2023

CERTIFICATIONS

Microsoft Certified: Azure AI Engineer Associate (AI-102)

Microsoft Certification
